## **POST 16**

OVERALL AIM: We are dedicated to preparing our students for the world of work and to empower them with the tools to build resilience and develop self confidence, self-belief, a moral compass and to create a learning environment where open mindedness and self-belief leads to success. We strive to unlock the potential of every student by providing a bespoke program of study which students find fulfilling and equips them for life beyond Post 16.

**ACADEMIC** 

In Post 16 we enable students to have the skills to integrate with the wider community and be actively participating citizens who develop the skills to access the world of work. We provide the opportunity for students to work as a team or independently and to communicate and interact with people from outside of school in unfamiliar and changing environments and to develop respect for each other.

In Post 16 we enable students to achieve their academic potential according to their academic stage rather than age. They have the opportunity to progress holistically in breadth and to progress as far as possible in depth. We create a learning environment where practical applications compliment academic learning.

By creating a safe environment to experience the outside world we support our students journey from adolescence to adulthood. We enable students to develop the personal resilience to cope with change and to manage, regulate and express their emotions in challenging situations.
